

# Annual Report 2022

## Welcome to *Totally Renewable Beechworth's* third annual report.

We started this year on a high with Battery Fever, a public forum to continue the conversation about the latest in battery tech, installations and uses; and gain input about our future actions and appetite for community batteries. In addition to hearing from our wonderful speakers, over 100 participants contributed to our reserarch project, that explored how we can ensure people's hopes and visions are embedded in community and neighbourhood scale battery installations. This project with the Australian National University, along with our learnings from Battery Fever, provides an important resource that informs our projects, activities and collaborations.

We've supported various funding applications for projects as diverse as EV charger and battery installations, resourcing of the community energy network and solar PV system installations; continued to collect benchmark data on our renewable energy status; and supported community committee's to apply for funds to install solar panels and/or batteries on their buildings.

Our participation in Mondo's EDGE project and Indigo Power's Indigo Power Aggregated Community-scale Battery project has provided valuable insight into the broader energy market and ensures our community has a voice in these important activities.

## Welcome to Totally Renewable Beechworth's third annual report (cont).

One of our own, Peter Anfruns, completed the Volunteer Home Energy Efficiency Advisors training. We're thrilled for Peter and keen to benefit from his learnings.

We're on the look out for new committee and project team members. If you haven't already, perhaps you'll feel inspired to become an active member of TRB also. You'd be most welcome.

I would personally like to say thanks to the TRB committee, project team members and supporters, who have contributed their enthusiasm, expertise and time over the last three years. Without you, TRB would have remained an idea not a reality. I am signing off as inaugural President, though remaining as a ordinary committee member. It's been a pleasure getting to know so many people from our community and beyond and I look forward to connecting with you again in 2023.

On behalf of the team at Totally Renewable Beechworth, we are glad to have you with us.

*Sue Gold*

ANNUAL FINANCE REPORT**

<b>Bank Balance held at 30 June 2021</b>		<b>\$721.80</b>
Plus, Income for 2021 Financial year	<u>\$8607.63</u>	<b>\$9,329.43</b>
Less Expenses for 2021 Financial year	-\$2,962.12	<b>\$6,367.31</b>
<b>Bank Balance for the year ended 30 June 2022</b>		<b><u>\$6,367.31</u></b>

Variation Nil

Variation between bank balance and accounts is nil, therefore accounts balance

Notes.

**Note 1.** Donations were gratefully received from Sue Gold for website hosting (\$30.00),

**Note 2. Annual fees and Joining fees.** The current membership fees are \$10.00 per person with a zero-dollar joining fee. We have relied significantly on our donations to operate. Currently our membership fee does not even cover our insurance (for 2022-23). I recommend that the Fees be increased this year.
